

The Policy Picture™ Coverage Chart Generator for Windows

The Policy Picture coverage chart generator for Windows provides you with a proven, fast and accurate means of producing insurance coverage charts.

Charts may be exported to your favorite drawing and word processing packages for easy edits and presentations

- Show over 2,000 policies at once
- Up to 81 color codes and 7 patterns for nearly limitless policy differentiation
- Handles complex non-concurrent quota shares
- Show up to five different allocation results on one chart
- Multiple scaling options for Y and X axes
- Show charts “to scale” or by layer
- Customization options

OVERVIEW

Plotting insurance coverage charts is often a time consuming, unwieldy process. Large coverage blocks might take weeks to plot manually, then often have to be drastically modified because of the late discovery of a previously unreported policy or data error.

Policy Picture is a tool that allows you to produce presentation quality insurance coverage charts in minutes. Charts that will aid you in coverage analyses and presentations. Charts that clearly illustrate coverage, limit impairment, overlaps, gaps and potential errors in coverage information.

Policy Picture’s flexible output options allow you to restrict charts to specific coverage and date ranges. The program’s magnification technology allows for varied scaling options on the same chart. Also, you may define up to 21 different types of user-defined policies with unique color and pattern codes on the same chart. Limit consumption may also be illustrated on any chart.

You can create a Policy Picture on any Windows supported printer, from letter size (and smaller) to several feet across and wide.

Policy Picture has been providing insurance professionals with high quality coverage charts since 1993.

SPECIFICATIONS

To run Policy Picture, you need:

- Any one of the following:
 - Microsoft Windows 95/98/Me
 - Microsoft Windows NT 4.0, SP3
 - Microsoft Windows 2000/XP
- Personal computer requirements:
 - PC with 66 MHz 486 processor or better (Pentium 90 MHz recommended)
 - at least 8 MB of memory (32 with Windows 95, 32 with Windows NT)
 - Hard disk with at least 30 MB free space, more disk space required for coverage block data as necessary
 - One 3.5” disk drive or CD ROM drive
 - SVGA or higher resolution monitor (17” color recommended)
- Printer requirements
 - Laser printer with 300 dpi or better resolution
 - Any color printer supported by the Windows operating systems
 - Any plotter supported by the Windows operating systems
- Data requirements
 - Policy Picture uses a Microsoft Access compatible database or can read data from Excel, Oracle, DB2, Sybase, Lotus, dBase, text and many other formats. The program can be custom engineered to use your existing attachment point or layer based policy database.
